**Keywords:** three dimension, method of characterization, novel, main character

This undergraduate thesis is entitled An Analysis of Three Dimensional of Human Character of The Main Characters in The Novel I Want to Eat Your Pancreas. This study is concerned with the method of the characterization based on the three dimensions of the main character the physiological, sociological, and psychological aspect of the main character. The data were taken from the novel I Want to Eat Your Pancreas published in 2015. The data of this study were analyzed using the qualitative method. Based on Egri's theory, there are three character dimensions (physiological, psychological, and sociological) involved in the shaping and presentation of the main character. From this study we can conclude that Haruki Shiga and Sakura Yamauchi are the main characters in this novel. From the physiological aspect it is described that Haruki is plain looking boy and Sakura is a cute girl. From the sociological aspect both of them has same result which is a Japanese and high scholar. In the psychological aspect Haruki is introverted, anti-social. Meanwhile Sakura has extrovert and positive personality, and she is a rather rambunctious person. She also has mature thoughts and wise in looking at life.
