

## **ABSTRACT**

Fitriyani, 2020 Gender Inequality Analysis of the Main Female Character in Mom's Night Out Movie (2014) a Feminism Study. A Final Project in Partial Fulfilment of the Requirements For Degree Award of Department of Language Education Graduate Program of the State Univeristy of Stikubank Semarang Supervisor By Teguh Kasprabowo, S.Pd.,M.Pd. FBIB-UNISBANK Semarang.

**Key Words:** Gender Inequality, Feminism Study, Gender inequality in women marriage.

This final project is written based on feminism studies. It is aimed to explain the reason why the main female character experienced gender inequality and explain the effects of gender inequality to main female character. This study based on theory of Liberal Feminism in second wave feminism study. This study is based on Lorber's theory (2001) explained about gender inequality in society in women marriage. The result showed that main female character experienced gender inequality acts in her marriage. The data in this study was taken from in character's dialog especially the main female characters. The right imbalance that caused the gender inequality and the impacts of gender inequality the main female character was discussed in the analysis of Mom's Night Out (2014). The finding concluded that this movie is about women marriage and obligation imbalance so main female character experienced gender inequality in her marriage life.
