## **Informasi artikel direview 3 reviewer internasional kompeten di bidangnya**

### **Reviewer 1 (Associate Editor of the Journal)**

The authors have to improve their paper 5107-2595 in order to be published in WSEAS Transactions.

#### **Format**

The format of the paper is not the WSEAS Format.

The author can find the format here <https://wseas.com/format.php>

Please improve the format following the style of any other article that is already published articles in WSEAS Journals.

#### **References**

The manuscript has references without numbers

See for example

(McLeod & Schell, 2007)

(Hansen et al., 2009)

These references are not in WSEAS format

The WSEAS requires numbering [1], [2], [3], ....

They must correct all the references inside their text, otherwise, their paper will not be published.

In general, a reference [n] must be inside the text as , [n], or as , [n].

That means that the [n] must be separated by punctuation marks.

To separate references use , not ;

**Exceptions:**

In [n] the authors (in this case you must not put comma)

According to [n] we have (in this case you must not put comma)

In-text citations should be begin with [1], and continuing in an ascending numerical order. The reference list should be arranged in the order of appearance of the in-text citations.

**Check also if the in-text citations exist in the reference list  
also Check if all the articles in the reference list exist in the in-text citations.**

**Check also if the in-text citations for Tables, Equations and Figures are connected with  
Tables, Equations and Figures properly.**

Note, that WSEAS publishes articles that are 100% **correct in English** and the **Format**

See again <https://wseas.com/format.php>

**Reviewer 2**

A comparative analysis of the bibliography presented in the introduction would be very useful.

The statistical analysis of the section 4 “Results and Discussion” in the present form is relatively weak and should be strengthened with more details and justifications.

More comments are required in the text about the table 6 (Path coefficient results of the warp PLS method).

**Reviewer 3**

What are the directions of future research in this area?

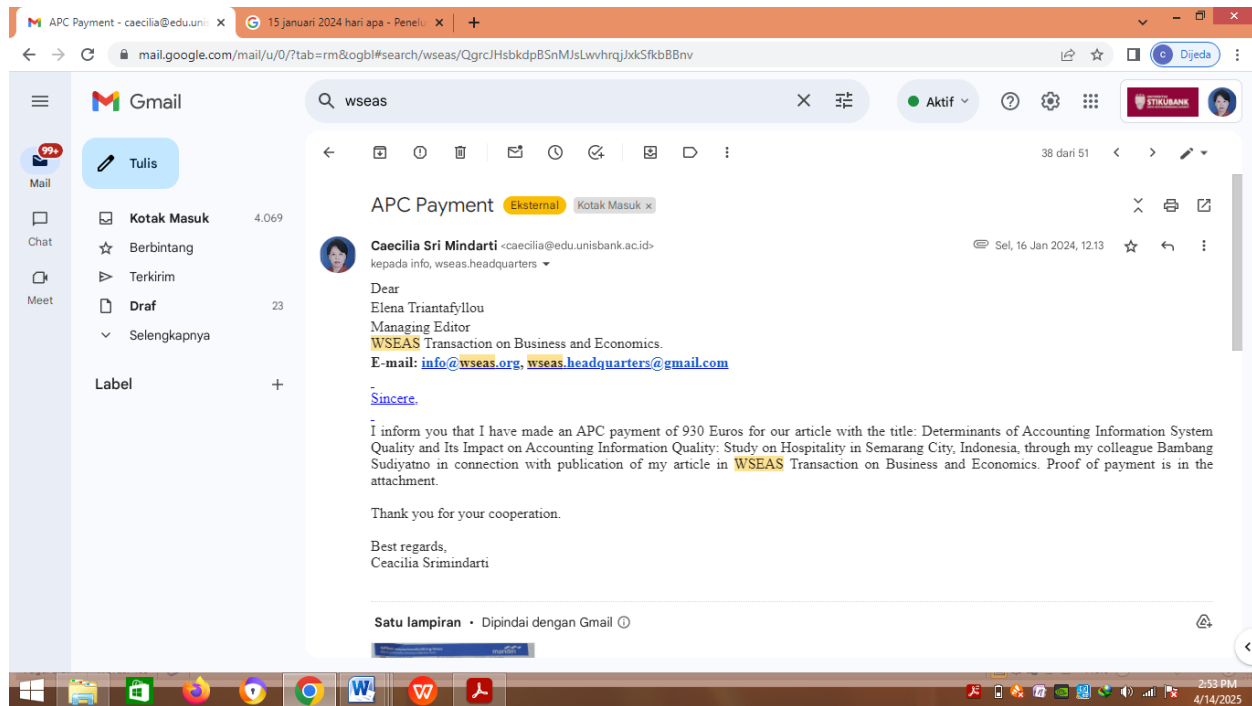

It is necessary that the authors clearly discuss how their work provides a contribution beyond alternative studies.

In the conclusions section, the authors summarize the main points of their study. The authors should explain the contribution of their methodology in comparison to the methodologies of other researchers. In addition, in the conclusions section, the authors should refer to the advantages of their method. They should emphasize and analyze them in detail .

Section “3.3- Data analysis” is poor and needs extension.

The screenshot shows a Gmail interface within a web browser. The browser's address bar displays the URL: `mail.google.com/mail/u/0/?tab=rm&ogbl#search/wseas/FMfcgzGxTPHKDQdwbfwVgVvgRHQFBrW`. The Gmail sidebar on the left includes navigation links for Mail (99%), Chat, and Meet, along with a list of folders: Kotak Masuk (4,077), Berbintang, Terkirim, Draft (23), and Selengkapnya. A 'Label' section with a plus icon is also visible. The main email view shows a search for 'wseas' with 15 results. The selected email is from Melandri Elvira to WSEAS Editing Department, dated May 30, 2024, at 08:56. The email body contains a greeting, a thank you note, and a signature. The reply area at the bottom features 'Balas' and 'Teruskan' buttons. The desktop taskbar at the bottom shows various application icons and a system clock indicating 12:22 PM on 4/17/2025.
