

ABSTRACT

This study aims to find empirical evidence about the effect of profitability, company size, institutional ownership, audit committee, independent commissioners and audit opinion on the timeliness of financial reporting. In addition, this study also aims to find empirical evidence on the role of audit opinion in moderating the effect of profitability, company size, institutional ownership, audit committee, and independent commissioners on the timeliness of financial reporting in manufacturing companies.

The population of this research is manufacturing companies listed on the Indonesian Stock Exchange in 2016-2018. The sample of this study were as many as 362 companies obtained using purposive sampling method.

The results of this study state that audit opinion moderates the effect of firm size on the timeliness of financial reporting. Profitability, company size, institutional ownership, audit committee, and independent commissioners do not affect the timeliness of financial reporting. Audit Opinion does not moderate the effect of profitability, institutional ownership, audit committee, and independent commissioners on timeliness of financial reporting.

Keywords: *profitability, company size, institutional ownership, audit committee, independent commissioner, audit opinion, timeliness of financial reporting.*
